CAPABILITY STATEMENT

Overall Capabilities

American Compactor, Inc. (ACI) is a small emerging business which manufactures and sells industrial strength trash and hazardous waste compactors which compact the material into 55 and 30 gallon drums and cubic yard boxes. These compactors are commonly used for hazardous waste such as paint filters, absorbent rags and wipes, and contaminated disposable gloves and clothing.

Equipment

ACI is committed to producing high quality compaction products which have a rapid return on investment. We use only the most durable and reliable pneumatic cylinders with a 27 or 30 inch stroke. All pneumatic units have a rapid cycle time of 20 seconds.

Personnel

C. David Shook and David R. Shook have over twenty-two years of combined experience in the field of waste compaction. This expertise has led to numerous product developments and enhancements which make ACI the leading producer of low cost compaction tools in the world.
